

How to submit your work to this new journal **iDarwin**

We, **iDarwin** Editors welcome many types of your work, including original investigation, review article, book review, database review, software review, journal review, conference report, conference announcement, general announcement, proposal, and opinion. Please indicate type of your work in Submitter Information File (downloadable from iDarwin website). Unless your submitting file is extraordinarily large, work of any file size is welcome. When you submit your work to **iDarwin**, only two files are necessary: Submitter Information File and your work file.

Language used in **iDarwin** is English for scientists, that is slightly different from common English. Celsius is used for temperature, not Fahrenheit, and metric system is used for scales. Do not use inch, foot, yard, pound, etc. Either British or American spelling, such as neighbour/neighbor, is acceptable.

Your work file should include following information:

Title of your work

Name of all authors (do not abbreviate any name)

Affiliation (if any) and email addresses of all authors

Main body of text
References*
Figures (if any)
Tables (if any)
Appendix (if any)**

*Please use **iDarwin** style. Example references are shown below.

<Book written by single author>

SAITOU Naruya (2018) *Introduction to Evolutionary Genomics Second Edition*. Springer.

<Chapter written by single author appeared in book>

SAITOU Naruya (2006) Relationship between genetic and linguistic differentiation of people in Eurasia. In OSADA Toshiki and HASE N. eds., *Proceedings of the Pre-symposium of RIHN and 7th ESCA Harvard-Kyoto Roundtable*, pp. 220-222.

<Single author work appeared in journal>

MINAKA Nobuhiro (1990) Cladograms and reticulated graphs: A proposal for graphic representation of cladistic structures. *Bulletin of the Biogeographical Society of Japan*, vol. 45, pp. 1-10.

<Two author work appeared in journal>

TAMURA Koichiro and NEI Masatoshi (1993) Estimation of the number of nucleotide substitutions in the control region of mitochondrial DNA in humans and chimpanzees. *Molecular Biology and Evolution*, vol. 10, pp. 512–526.

<More than two author work appeared in journal>

SATTA Yoko, KLEIN Jan, and TAKAHATA Naoyuki (2000) DNA archives and our nearest relative: The trichotomy problem revisited. *Molecular Phylogenetics and Evolution*, vol. 14, pp. 259–275.

<Many author work appeared in journal>

UEDA Shintaroh, WATANABE Yoshihisa, SAITOU Naruya, OMOTO Keiichi, HAYASHIDA Hidenori, MIYATA Takashi, HISAJIMA Hiroshi, and HONJO Tasuku (1989) Nucleotide sequences of immunoglobulin-epsilon pseudogenes in man and apes and their phylogenetic relationships. *Journal of Molecular Biology*, vol. 205, pp. 85-90.

Or

UEDA Shintaroh and others (1989) Nucleotide sequences of immunoglobulin-epsilon pseudogenes in man and apes and their phylogenetic relationships. *Journal of Molecular Biology*, vol. 205, pp. 85-90.

**Nowadays many journal articles include supplementary information that are separated from main paper. However, this is only good for publishers but not for readers. We therefore ask authors to use Appendix which may correspond to supplementary information. By this way, we keep one work as one downloadable file.

When you are ready to submit your work, please send Submitter Information File and your work file to idarwin.editorial.office@nig.ac.jp. Both files should be in pdf format.
